INTRALOGISTICA ITALIA: THE NEXT EDITION OF THE INNOVATION ALLIANCE CHANGES FORMAT BUT SYNERGIES WILL CONTINUE

In order to provide the market with as much support as possible, INTRALOGISTICA ITALIA, together with IPACK-IMA and PRINT4ALL, has decided to hold its exhibition in 2022. The supply-chain project will nevertheless continue to partner with PLAST and MEAT-TECH thanks to specific cross-sectorial events that will be held over the next two years.

Milan, 24th June 2020. Apart but united: **INTRALOGISTICA ITALIA**, in agreement with its other partner tradeshows in The Innovation Alliance, has announced new dates for the leading exhibition that unites the entire world of instrumental mechanics in a supply-chain logic.

The leading tradeshow in Italy dedicated to the most innovative solutions and integrated systems for industrial handling, warehouse management and storage and picking of goods, has exceptionally moved its next edition to a year later and together with the tradeshows IPACK-IMA and Print4All has scheduled the event from **May 3rd to 6th 2022 at Fieramilano Rho**.

This decision was made based on the extraordinary events of recent months and takes into account both the enormous changes affecting tradeshow calendars for 2020-2021 and, above all, sector needs, which have led the organisers to postpone the exhibition by one year in order to offer operators yet another successful edition.

"We are convinced that we have made a decision that respects industry needs in the best way possible. It is a contingent decision that does not question the value of the synergy between INTRALOGISTICA ITALIA and other partner tradeshows, which together represent the best of industrial mechanics united in one supply-chain logic."

These are the words of Andreas Zuege, General Manager of Hannover Fairs International GmbH, who thus comments on the decision made in agreement with the other partners in The Innovation Alliance.

The INTERLOGISTICA ITALIA organisational secretariat is working at full speed on initiatives for the coming months and for the entire year 2021 and on guaranteeing maximum visibility to companies that have already confirmed participation at the tradeshow. The first event on the calendar is the presentation of the results of the second edition of the Intralogistica Observatory at the end of September 2020.

Further information will be available soon on the exhibition website: www.intralogistica-italia.com

Deutsche Messe
